On this site manuals, documents , brochures , blueprints are available for purchase in media format We accept every Credit Card Via Pay Pal. You do not have to register to use PayPal. An aircraft is a machine that is able to fly by gaining support from the air. It counters the force of gravity by using either static lift or by using the dynamic lift of an airfoil, or in a few cases the downward thrust from jet engines. Common examples of aircraft include airplanes, helicopters, airships (including blimps), gliders, and hot air balloons. ...Continental IO-360, TSIO-360, LTSIO-360 Aircraft Engine Illustrated Parts Breakdown Manual (English Language) Form No. X30031A , 1977Sensenich Support Documentation.
