

Download Cna Prep Guide 2nd Edition

A skin break can result in a pressure ulcer (also called a bedsore, or decubitus ulcer) found over any bony part, such as the tailbone (coccyx), hip, back, elbow, breasts, spine, shoulder, or the back or side of the head. The term bedsore is misleading because a pressure ulcer can occur outside of bed by prolonged sitting or any pressure on the skin that decreases the blood supply to that area. Exam Alert. Key sources are available to you in the workplace to help prevent medication errors, including the nurse or the agency pharmacist. Keeping abreast of drug literature and related educational materials is also necessary, as is attending continuing education seminars and other activities necessary to maintain your knowledge and skills.
