

Download Depression And Attempted Suicide In Adolescents

Suicide is considered a possible complication of depressive illness in combination with other risk factors because suicidal thoughts and behavior can be symptoms of moderate to severe depression. People contemplating suicide or experiencing the depths of a severe depression need to know they are not alone. From teenagers to college students, LGBT to the elderly, people struggling with depression and suicidal thoughts need options, reassurance, hope and help. Teenagers and Suicide By Judy Shepps Battle Someone, somewhere, commits suicide every 18 minutes. Every day 80 Americans take their own lives and more than 1,900 are seen in hospital emergency rooms for self-inflicted injury. Teen suicide is a major cause of death among teens, though many do not recognize suicide as a serious threat to a teenager's well being. Suicide is the third leading cause of death among adolescents and teenagers.
