Acceler8: OptiChem[®], ϵ permeable 3D microarray coatings for DNA, proteins, and antibodies - Coatings, surface chemistry and instrumentation for unblocked bio-analytic affinity binding assay design with ultra-low nonspecific binding and adsorption of proteins, antibodies, high signal to noise, high sensitivity, high specificity, and optimized binding density

Course Descriptions. Courses offered in our department for Applied Mechanics, Civil Engineering and Mechanical Engineering are listed below. Be aware that some courses are not offered every year; see the course schedule page to check if the class is offered this year.. Applied Mechanics Courses

Course Planning Aids The Vergil course planning tool and Course Bulletin are useful resources when searching for classes. For convenience, Mechanical Engineering courses are listed below. Mechanical Engineering Courses

Geotechnical engineering is the branch of civil engineering concerned with the engineering behavior of earth materials. Geotechnical engineering is important in civil engineering, but also has applications in military, mining, petroleum and other engineering disciplines that are concerned with construction occurring on the surface or within the ground.
