

# Download How To Dunk A Doughnut The Science Of Everyday Life

How to Dunk a Doughnut by Len Fisher humorously describes how scientists think about everyday life. Fisher, a research fellow at the University of Bristol's Department of Physics, uses a variety of mundane problems to illustrate the scientific mind. A fun look at the science behind eating, cooking, tools, grocery shopping, and other areas of our daily life. I learned a few tricks along the way, such as why you should let roasts sit after roasting them (conduction of heat from the hotter outer portion to the cooler inner portion allows for a more evenly cooked piece of meat), and why you should drill a lead hole before driving in a nail ... The book provides scientific answers to such familiar questions as how to dunk a biscuit, how to check a supermarket bill quickly, how to use DIY tools more efficiently and how to use the laws of thermodynamics to boil the perfect egg.
