

Download Impaired A Nurses Story Of Addiction And Recovery

Addiction Intervention and Recovery Services for Nursing Professionals. The Program for Recovering Nurses (PRN) is a confidential alternative to formal disciplinary action offered by the Idaho Board of Nursing. Substance abuse occurs across all generations, cultures, and occupations, including nursing. About 1 in 10, or 10-15% of all nurses, may be impaired or in recovery from alcohol or drug addiction. Residential treatment is one of the most time-tested and reliable methods of addiction recovery treatment. The full-time care, supportive structure and safe environment provided by residential programs ensure that recovery clients get the attention they need within a distraction-free space focused entirely on their healing. Bath salts have caused a large number of emergency room visits and poison control calls all over the nation. Those who call, or are seen due to bath salts complications report having an increased heart rate, high blood pressure, and chest pains.
