I just purchased a 2008 Kubota L4400 from an individual. It only has about 130 hrs on it. It worked fine at the sellers house but when I got it home I have a few problems. The Range or Shuttle shift lever sticks in high; When I try to start the engine I hear a "click" and all the dash lights go off like the battery is dead; and I cannot figure out how to get the hood open. There are different variants of the L4610, see F.A.Q. The parts listed below are for L4610DT-HST-C. Please call Messicks with the serial number to verify the proper parts to fit other variants.
