Anatomy and Physiology. 2/14/2012 Anatomy and Physiology Muscle Grip Strength Lab Report Introduction: Skeletal muscle is a form of striated muscle tissue existing under the voluntary control of the somatic nervous system (Medscape 1). Skeletal muscle is part of the three big muscle types, it is connected to bones by tendons (Medscape 1). Hemodynamic stability can be simply explained as the stable blood flow. If a person is hemodynamically stable, it means that he/she has a stable heart pump and good circulation of blood. Arterial Blood Gas (ABG) analysis requires in-depth expertise. If the results are not understood right, or are wrongly interpreted, it can result in wrong diagnosis and end up in an inappropriate management of the patient.
