Also for: A1sh, A2shcpu (s1).Sheetfed offset printing presses are used to print on individual sheets of paper, cardboard, etc., that are fed into the press one at a time. Sheetfed presses are commonly used for low quantity printing, such as brochures, short-run magazines, business forms, and general commercial printing. Unless you have optimum cutting conditions, I would try and stay away from the optimized Epacks. (1535 & 1536) This I have learned over time, as well as being told by the guy that actually wrote that book.
