In this lesson, we'll review what prokaryotes are first. Then, we'll explain the steps and process of protein synthesis in prokaryotes and discover what makes it unique from protein synthesis in ...Protein Synthesis Inhibitors. There are some molecules that can stop protein synthesis in bacteria. As mentioned above, there are several stages of protein synthesis that must happen to make a ...A medication to lower blood pressure works very effectively in a 32-year-old, but not in her 68-year-old mother. A reason for this could be that A) A woman over age 65 has naturally low blood pressure B) Older people metabolize some drugs at different rates than do younger people C) the mother has a lower metabolic rate than her daughter.v Foreword A study of the structure and function of nucleic acids is needed to be able to understand how information controlling the characteristics of an
