Higher Education Products & Services. We're constantly creating and innovating more effective and affordable ways to learn. Explore our products and services, and discover how you can make learning possible for all students. Net delay is the difference between the time a signal is first applied to the net and the time it reaches other devices connected to that net. It is due to the finite resistance and capacitance of the net. It is also known as wire delay. Wire delay = function of $(R_{net}, C_{net} + C_{pin})$ International Journal of Engineering Research and Applications (IJERA) is an open access online peer reviewed international journal that publishes research ..
