

# Download Research Report Guidelines

Research Reporting Guidelines and Initiatives: By Organization. The aim is to improve the quality and credibility of scientific peer review and publication and to help advance the efficiency, effectiveness, and equitability of the dissemination of biomedical information throughout the world. A report is a type of work most widely applied in psychology, engineering, and the sciences. Here, your goal is to write concisely on the topic so that readers may easily comprehend the results and goal of the paper. Research report structure

Preparing a Research Report A research experience provides undergraduates a problem-solving activity unlike anything else in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty advisor. Guidelines on how to prepare a professional-style research report are not routinely available. For this reason, the following information on report writing and format is provided to be helpful to undergraduate researchers and to faculty advisors. Organization of the Research Report
