The Winchester Model 63

http://www.shootingtimes.com/2010/09/23/longgun_reviews_st_winchester63_200810/ Introduced in 1933, the Model 63 was the first semiauto rifle ...The .270 Winchester is a rifle cartridge developed by Winchester Repeating Arms Company in 1923 and unveiled in 1925 as a chambering for their bolt-action Model 54. The cartridge is a necked-down .30-03 Springfield, which is the same length as the .280 Remington, both of which are longer than the .30-06 Springfield. The .270, .280, and .30-06 were all derived from the .30-03 parent case. The Henry rifle used a .44 caliber cartridge with 26 to 28 grains (1.7 to 1.8 g) of black powder. This gave it significantly lower muzzle velocity and energy than other repeaters of the era, such as the Spencer. The lever action, on the down-stroke, ejected the spent cartridge from the chamber and cocked the hammer. Find used cars in Martinsburg Winchester at Miller Auto Group. We have a ton of used cars at great prices ready for a test drive.
